🔗 Portfolio

SUMMARY

Backend Software Engineer with expertise in .NET Core, ASP.NET MVC Core, and API development. Specializing in building .NET-based backend services and automation scripts, with a strong focus on clean architecture, scalability, and maintainability. Experienced in developing backend systems that parse, centralize, and automate disputes for financial institutions.

PROFESSIONAL EXPERIENCE

NCR Atleos

Software Engineer II

09/2025 – Present | Belgrade, Serbia

- Developed a scalable backend dispute management platform serving several financial institutions, enabling partial automation of ticketing and core processes.
- Spearheaded the development of backend automation scripts and API integrations to manage ATM ticketing workflows for financial institutions.
- Designed and implemented an MSSQL database for a proprietary dispute management system, enabling secure, efficient, and maintainable backend data handling.

Software Engineer I

08/2024 – 09/2025 | Belgrade, Serbia

- Spearheaded the development of backend automation scripts that streamlined repetitive processes, reduced manual effort, and accelerated business operations, improving overall efficiency and reliability.
- Developed automation scripts using .NET Core, Playwright and UiPath to ensure robust and scalable solutions.
- Driving refactoring, debugging and optimization initiatives to ensure maintainable, high-performance codebases aligned with architectural best practices.

SAP Fioneer

09/2022 – 10/2023 | Belgrade, Serbia

SAP Developer

- Contributed to developing a wrapper program to automate the maintenance of posting periods in FPSL software.
- Actively worked on solving client's software problems through debugging.
- Actively maintaining FPSL software by creating code fixes through tickets.

Hedwell

SAP Developer

09/2022 – 01/2023 | Belgrade, Serbia

- Delivered S4HANA integrations and ABAP reporting.
- ABAP Programming & Debugging.

SAP Developer Intern

06/2022 – 09/2022 | Belgrade, Serbia

- Supported ABAP development and troubleshooting.
- Learned about IFRS 17 Scope and its implementation through various projects.
- SAP S4HANA Architecture & Integration.

LINKgroup

Full-stack Developer Intern

01/2022 – 03/2022 | Belgrade, Serbia

- Designed and developed relational database with MSSQL from scratch for the assigned project.
- Developed CRUD functionalities with C#, ASP.NET MVC Core, and EF.
- Developed and designed front-end parts.

EDUCATION

Information Technology School - ITS

2019 | Belgrade, Serbia
